# **OLYMPUS**<sup>®</sup>

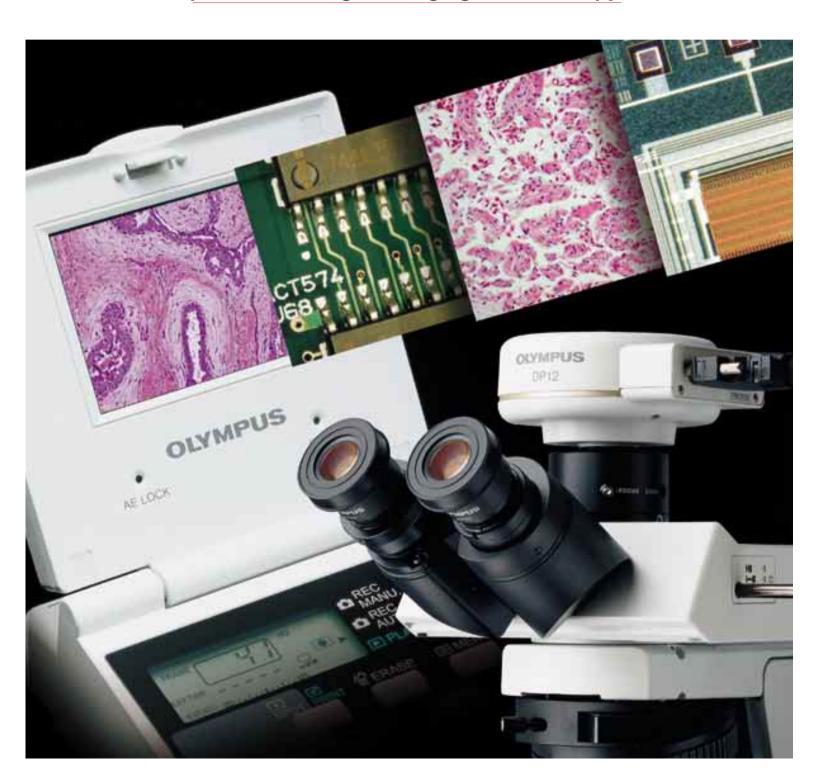

Olympus is about life. About photographic innovations that capture precious moments of life. About advanced medical technology that saves lives. About information- and industry-related products that make possible a better living. About adding to the richness and quality of life for everyone. Olympus. Quality products with a **FOCUS ON LIFE** 

MICROSCOPE DIGITAL CAMERA

**DP12** 

3.34 MILLION PIXEL RESOLUTION

## The new compact solution for professional digital imaging in microscopy

## Compact, easy-to-use design and excellent

## High-resolution 3.34 million pixel imaging

• The DP12 is equipped with a 1/1.8 inch interlaced scan CCD with 3.34M pixel resolution which ensures highly precise digital images. Even very fine structures of the specimen are clearly imaged.

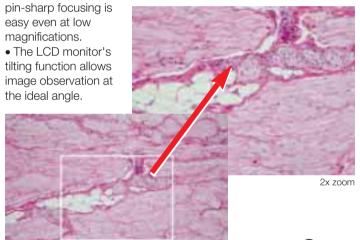

The maximum image resolution is 2048 x 1536 pixels.

• SmartMedia cards used with DPOF-compliant P-200/P-330/P-400 printers will easily produce superb printed images whose quality rivals that of film photography.

## **Easy Focusing**

- $\bullet$  3.5" LCD monitor provides real-time display of large, easy-to-see images for faster, more accurate focusing and framing.
- With the focusing indicator and a 2 x electronic zoom function,

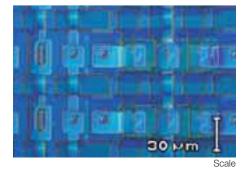

## **Direct scale bar imprint**

• A calibrated scale bar can be superimposed on the image in either a horizontal or vertical orientation. The scale bar can be saved and printed with the image.

## Multi-functional, compact control unit

- Compact and robust stand alone camera for use with or without a PC.
- The camera head is equipped with a universal C-mount thread allowing attachment to almost any microscope.
- The 200,000 pixel 3.5" LCD monitor is integrated in the control pad forming a compact unit which uses desk space more effectively.
- The tiltable LCD monitor also functions as a protective lid for the control unit.
- The camera is operated entirely from the control unit.
  Users do not need to touch the camera head or the microscope for exposure.

retained on the SmartMedia card when the power is turned off.

16-frame display

## ■Other features DP-TRAD

The tripod mount for macro photography is optionally available. (the use on a tripod requires a macro lens which is not included)

## Video signal output\*

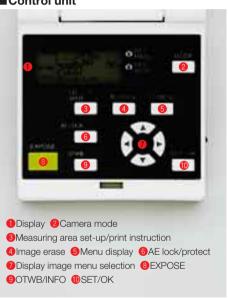

The control unit includes a video-output port for NTSC or PAL signals, allowing image display on an external video monitor.

\* Please consult your nearest Olympus dealer for appropriate external video monitors.
